

# 2018 PERTH CBD OFFICE MARKET CENSUS

APR 2018

# NEW FROM Y RESEARCH

## 2018 PERTH CBD OFFICE MARKET CENSUS

The 2018 edition of our unique analysis of the Perth CBD office market is now available.

The Report has been developed by examining the occupancy floor by floor of each of the 291 office buildings across the Perth CBD, therefore providing the most comprehensive and detailed breakdown available of our changing city.

The Report provides strong evidence of the two tier market in the CBD with strong demand limited to particular properties. The 2018 Report highlights, for the first time, which industries were this year's big winners and losers, as well as which industries have thrived since 2012.

Find out how our CBD is changing in Y Research's 2018, Perth CBD Office Market Census.

This Report details the major occupiers of office space in the Perth CBD as well as the current level of vacancy. Major occupiers are identified by:

- > Their industry (Companies are classified under 35 industries ranging from oil and gas producers through to agricultural companies);
- > Building grade (who are the major occupiers of Premium, A, B, C and D Grade buildings?);
- > Location in the CBD (which companies occupy the Core, East and West of the CBD?); and
- > Vacancies by Building grade, location and age.

If you have any questions regarding the Report, including its coverage, please contact:
