# **WEST AUSTRALIAN OFFICE MARKET RESEARCH**

**SUBSCRIPTION PACKAGE**

## 2016 WEST AUSTRALIAN OFFICE RESEARCH SUBSCRIBER PACKAGE

In the wake of the resources boom, West Australian office markets continue to evolve.

New drivers of demand, such as education, medical and shared work spaces, are emerging as the state economy diversifies from its reliance on iron ore and oil and gas producers and their engineering partners.

Our office market information products will help to guide you through changing West Australian office markets, from identifying under supplied suburban markets through to potential tenant identification.

Y Research provides the most wide-ranging overview of office space in Western Australia. Included in the Office Market research subscription are copies of the West Australian Suburban Office Report and the Perth CBD Office Tenant Census.

### West Australian Suburban Office Report

Y Research's West Australian Suburban Office Report is the most comprehensive source of information on office space outside the Perth CBD and West Perth.

Updated twice a year in May and November, the West Australian Suburban Office Report currently covers 1.7 million square metres of stock across 50 metropolitan Perth suburbs with more than 5,000 sq m of office space.

The Report provides results at a market, region and suburb level. Suburbs covered include Subiaco, Herdsman, Northbridge, Belmont and Fremantle.

Analysis covers total stock and vacancy, market rents, recent supply additions and net absorption for each suburb and region. Details of developments under construction, and approved, are covered for each suburb.

**COST OF SINGLE REPORT:  
\$990 INC GST**

### Perth CBD Office Tenant Census

The 2016 Perth CBD Office Tenant Census has been developed by examining the occupancy floor by floor of 278 office buildings across the Perth CBD.

Based on collected data, this annual Report determines which industries and companies are the largest occupiers of office space in the Perth CBD as well as current vacancies. Occupancy profiles by building grade and CBD precinct (East, West or Core) are also outlined.

**COST OF A SINGLE REPORT:  
\$1,100 INC GST**

### Purchase Options
